## PERSONAL PROJECTS

### JUET Outpass (08/2022 - Present)

- JUET Student Outpass is an app that will be used by students and staff, in which student has to log in and apply for outpass online instead of wasting time in the offline process. After applying for outpass one OTP is shared with the parents and after their verification, the application is forwarded to the higher authorities of the university for their verification.
- <https://github.com/sanyamj138/JUET-Outpass>.

### VChat (07/2022 - 08/2022)

- VChat is a chatting app for Jaypee University of Engineering and Technology students to increase the interaction between the students at the university.
- This app uses firebase for storing login information and message.
- Used Lottie for launch screen animation.
- <https://github.com/sanyamj138/VChat>.

### Tease-Brain (04/2022 - 05/2022)

- Tease-Brain is a mind game app. The main activity asks you the game you want to play, then it set the screen to the particular game the user selects. This app contains three games Tic-Tac-Toe, Guess That Number, and Brain Teaser.
- Used Lottie for launch screen animation.
- Used KenBurnsView for background animation.
- <https://github.com/sanyamj138/Tease-Brain> is the GitHub link of the project.
